

# Failstatementsomitted

This page comes from a [thread](#) in mailing list.

Current script to find out all possible test cases which omit "fail" statement is [here](#).

## Usage of this script:

```
perl failFinder.pl root_of_module
```

e.g. Search out all related lines in luni module and redirect it to result.txt

```
perl failFinder.pl trunk/modules/luni > result.txt
```

e.g. Search out all related lines in all modules and redirect it to result.txt

```
perl failFinder.pl trunk/modules/ > result.txt
```

## Current result of all modules (filename +linenumber):

```
modules/archive/src/test/java/org/apache/harmony/archive/tests/java/util/jar/JarFileTest.java +190
