

JBoss

Simple steps to run JBoss on Harmony:

- Build classlib
- Build DRLVM
- Copy tools.jar from \$JDK\$/lib to \$JRE\$/lib
- If <http://issues.apache.org/jira/browse/HARMONY-1901> is not resolved yet please edit \$JRE\$/lib/boot/bootclasspath.properties and comment following lines:
 - bootclasspath.38=mx4j_3.0.1/mx4j.jar
 - bootclasspath.39=mx4j_3.0.1/mx4j-remote.jar
- set \$JAVA_HOME variable to the path to \$JRE\$
- Run it:
 - On Windows: \$JBoss_HOME\$/bin/run.bat -c \$server_name\$,
 - On Linux: \$JBoss_HOME\$/bin/run.sh -c \$server_name\$
