

JUnit

Harmony has passed all testcases provided by JUnit 4.1.

With J9 VM, harmony passes both on windows xp2 and redhat enterprise 4.0. While drlvm fails on linux.

HowTo:

1. Download junit4.1 from <http://prdownloads.sourceforge.net/junit/junit4.1.zip?download>
2. Unzip it to a directory called JUNIT_ROOT.
3. Run below script to test it:

```
set PATH=PATH_TO_JRE_BIN
set CLASSPATH=JUNIT_ROOT;JUNIT_ROOT/junit-4.1.jar
java junit.tests.AllTests
java junit.samples.AllTests
```

Performance:

VM	Windows xp2	Redhat Enterprise4
RI	0.985 0.921	0.75 0.717
J9	4.25 2.61	2.888 2.897
drlvm	8.437 5.359	/

*The former data represents the time to run junit.tests.AllTests. The latter,junit.samples.AllTests.

Drlvm fails on [RedHat](#) Enterprise 4.0 with such output:

```
.....
.....
.....E..E....
Time: 5.157
