2	Notetext (to increase visualization and readability)	Switch to <i>Italic</i> Reduce too much white space around the note, reduce notetext indentation			
3	Fixed values for the headers and notes font size - aca:structured-macro ac:name=" unmigrated-wiki-markup" ac:schema-version="1" ac:macro-id="d4ebc3ea-d7b2-410a-bot1-81e38bd640b7" > -ac:plain-text-body> (for usability reasons)</td><td>If you change the font size in Internet Explorer to largest: View > T ext Size > Largest, headers will be much smaller than the body text. Should changed them to relative sizes.</td><td>[Al] {(`)}h2{(`)} has font size of {(`)}100% set, so that it will have the font of the same size as paragraph text. And the font size of {(`})h3{(`}} will be even smaller {{(`)}95% `). I think it should be corrected.				
4	Margin of menu list	Decrease the margin of lists in the menu, so that menu items are closer to their header.			
5	Font of printed pages	Switch to a <i>serif</i> font (for example, <i>Times New Roman</i>). <i>Serif</i> fonts are better for printed reading, while <i>sans-serif</i> ones are used for screen rendering.			
6	Back to Top links	These links stand out too much. Possible solutions 1.Use smaller font 2.Use other color <ac:structured-macro ac:macro-id="dd5ade4b-50da-4272-afbd-dd011017a0b" ac:name="unmigrated-wiki-markup" ac:schema-version="1">-ac:plain-text-body><{[CDATA[3.Use image instead of text]}</ac:structured-macro>	[Al] I vote for smaller font, and possibly black color for these links.]]>
