StatusReports StatusReportForMay2008

General Comments

There are no project-level issues.

XML Graphics Commons

We've released XML Graphics Commons 1.3 (with the new image loading framework). Since then a number of bugfixes and minor enhancements happened which results in version 1.3.1 to be released shortly.

Batik

Very little development activity since the last release. There was some discussion about turning Batik into an SVG plug-in for browsers but so far it's just a good idea.

FOP

We've release FOP 0.95beta. Since then we've fixed a number of bugs. 0.95 final is not far away. In the Trunk, normal development continues while 0.95 is stabilized. The most notable changes are additional font functionality and integer values for keeps.
