

StatusReports StatusReportForMay2010

General Comments

There are no issues that require Board attention. Developer activity has gone down which can become a real concern at some point since patches are not processed in a timely manner anymore. No releases were cut in the last three months and none can be expected in the immediate future due to low activity.

XML Graphics Commons

No major changes, just a few improvements and fixes in various components, mainly PostScript production.

Batik

There have been practically no changes on the codebase in the last three months. User list activity has gone down a bit but questions are mostly getting answers.

Fop

No major changes, just a few improvements and fixes in various components. User list activity has just a bit lower than last quarter. No big changes there.
