

StatusReports StatusReportForNovember2006

General Comments

Not much going on on the project level.

XML Graphics Commons

A version 1.1 is soon to be released in preparation of the next FOP release.

Batik

Most work was on bugfixing. Planning for a new release has started.

The Rhino project has been asked to relicense under the MPL 1.1 which should solve the problem with the license policy. They said, [they'll look into it \(Nov 3\)](#).

FOP

There were improvements in the font area, for page-number-citation and the bitmap renderers. It was also encouraging to receive patches from new contributors, including a patch for CMYK support. One new committer: Vincent Hennebert (he was one of the GSoC students)

The 0.93 release is still to be done.
