

GdataServer FuturePlanning

What happens in the future

- Creating a web based administration interface
 - Adding JMX support to the server
 - Creating a production ready storage component maybe using a hibernate mapping to support RDBMS
 - Refactoring of the administration interface
 - Providing an Apache Axis Webservice administration interface.
 - Enable the possibility to add subfeeds to created feed instances
-

Ideas

`If you have any ideas for new features or something should be changed in the future feel free to edit this page and add your ideas here.`
