

HowToContributeFastPath

1. Fork <https://github.com/apache/lucene> (this will create <https://github.com/USERNAME/lucene>)
2. From eclipse workspace/ directory, `git clone git@github.com:USERNAME/lucene.git`
3. `cd lucene`
4. `./gradlew eclipse`
5. File->New Java Project-> Project Name:"lucene" and click Finish
6. <<hack code, make local commits>>
7. once you are happy, and 'ant test' succeeds, make a patch:
`git format-patch --stdout -p --no-prefix origin > LUCENE-XXXX.patch`
8. create a new JIRA issue at <https://issues.apache.org/jira/browse/LUCENE> and attach your patch
