LucenePlanning

Placeholder for Lucene planning beyond 2.0 (see Lucene2Whiteboard) for details on Lucene 2.0 changes. Changes may include 2.x or even 3.0

- Detailed Docs
- Misc API Brainstorming for 3.0
  - Replace Interfaces with Abstract Classes
  - Separate indexing/searching Document/Field APIs
  - Change internal doc ids to be longs

Detailed Docs

1. FlexibleIndexing
2. Java_1.5_Migration
3. Payload_Planning
4. Documentation_Improvements

Misc API Brainstorming for 3.0

3.0 will give us a lot of opportunity to "wipe the slate" of past API transgressions, here's a good place to list misc stuff that might be worth pursuing.

Replace Interfaces with Abstract Classes

? good examples ?

Separate indexing/searching Document/Field APIs

Some past discussion...

- https://issues.apache.org/jira/browse/LUCENE-778
- http://www.nabble.com/Fieldable%2C-AbstractField%2C-Field-to16108347.html

Change internal doc ids to be longs

Any reason not to support a larger address space for documents?
