

LuceneResources

<http://sourceforge.net/projects/normalizer/>

"Contextual rule-based text normalization engine written in java, that can be used to implement stemming algorithms or phonetic normalizers. The project includes a french stemmer/phonetic normalizer, and a soundex implementation. Includes a Lucene Analyzer"

Nutch (<http://www.nutch.org/>) is a web search engine that uses Lucene as it's search technology. It adds a scalable crawler, link database, distributed searching, and a web-based search interface.

Luke (<http://www.getopt.org/luke/>), Lucene index browser.

CodeCrawler (<http://codecrawler.sourceforge.net/>), is a smart web-based search engine specifically built for use by developers for searching source code that uses Lucene.

RealtimeSearch (<http://issues.apache.org/jira/browse/LUCENE-1313>) provides realtime search using Lucene.
