

ReleaseNote431

June 2013, Apache Lucene™ 4.3.1 available

The Lucene PMC is pleased to announce the release of Apache Lucene 4.3.1

Apache Lucene is a high-performance, full-featured text search engine library written entirely in Java. It is a technology suitable for nearly any application that requires full-text search, especially cross-platform.

The release is available for immediate download at:

<http://lucene.apache.org/core/mirrors-core-latest-redirect.html>

Lucene 4.3.1 includes 12 bug fixes and 1 optimizations, including fixes for a serious bug that can cause deadlock.

See the CHANGES.txt file included with the release for a full list of changes and further details.

Please report any feedback to the mailing lists (<http://lucene.apache.org/core/discussion.html>)

Note: The Apache Software Foundation uses an extensive mirroring network for distributing releases. It is possible that the mirror you are using may not have replicated the release yet. If that is the case, please try another mirror. This also goes for Maven access.
