

# ReleaseNote601

28 May 2016, Apache Lucene™ 6.0.1 available

The Lucene PMC is pleased to announce the release of Apache Lucene 6.0.1

Apache Lucene is a high-performance, full-featured text search engine library written entirely in Java. It is a technology suitable for nearly any application that requires full-text search, especially cross-platform.

This release contains 10 bug fixes since the 6.0.0 release, and one new feature:

- \* Spatial-extras DateRangePrefixTree's Calendar is now configurable, to e.g. clear the Gregorian Change Date. Also, toString(cal) is now identical to DateTimeFormatter.ISO\_INSTANT.

The release is available for immediate download at:

<http://www.apache.org/dyn/closer.lua/lucene/java/6.0.1>

Please read CHANGES.txt for a full list of new features and changes:

[https://lucene.apache.org/core/6\\_0\\_1/changes/Changes.html](https://lucene.apache.org/core/6_0_1/changes/Changes.html)

Please report any feedback to the mailing lists  
(<http://lucene.apache.org/core/discussion.html>)

Note: The Apache Software Foundation uses an extensive mirroring network for distributing releases. It is possible that the mirror you are using may not have replicated the release yet. If that is the case, please try another mirror. This also goes for Maven access.
