

CommercialMaybe

Maybe these use [SpamAssassin](#)

The following might use SpamAssassin. It has been suggested that they use SpamAssassin, but their public websites do not give any indication either way.) Other versions: [CommercialWindows](#), [CommercialMacOSX](#), [CommercialUnix](#), [CommercialNetworkAppliances](#), [CommercialISPs](#), [CommercialMaybe](#)

Listing

- [BlackSpider](#) relay service (JustinMason: do [BlackSpider](#) use [SpamAssassin](#)? There's no indication on their website that they do.)
- [Bastion Mail](#) relay service based on Spam Assassin and Mail Scanner.
- [MessageLabs](#) relay service (JustinMason: do [MessageLabs](#) still use SA in their system? I don't think they do, any more.)
- [GMX](#) (free)mail service (they once [definitely](#) used [SpamAssassin](#) and it feels like they still do, at least in parts)

Not Listed?

If your commercial product uses [SpamAssassin](#), and is not listed here, please feel free to edit the page and add details. However, keep it short – preferably just a link – and we reserve the right to edit or even remove whatever's published here (especially if we cannot determine from publically-accessible information that the product *does* use SpamAssassin).

For fairness, we're trying to keep the items in each category in alphabetical order.
