

Ivo Truxa

Ivo Truxa

My contributions to [SpamAssassin](#):

- [TxRep](#) sender reputation system
- [sa-heatu v2](#) - tool for manipulating Berkeley DB storage of AWL and [TxRep](#)
- [sa-normalize](#) - tool for previewing US-ASCII and UTF-8 text normalizing
- [ASCII normalizing patch](#) - normalizing and transcribing email of any character set to plain US-ASCII
- Some SA Wiki editing (mostly AWL and [TxRep](#) related)
- ... hopefully more to come

You can contact me at truxa@truxoft.com with any questions, or suggestions relevant to my work

I am not a native English speaker (and a sloppy writer in plus), so if you spot any mistakes, or improper formulations in [TxRep](#) documentation, or in other texts written by myself, please do not hesitate to report them to me.

Thank you,
Ivo
