June2016

June 2016 Report

Xerces-J

A couple minor updates were recently committed, otherwise it's been quiet on the development front over the last four months. There was another user query on the mailing list about having a new release. We still need volunteers to help drive one.

Mailing list traffic continues to be very low; only 20+ posts on the j-dev and j-users lists since the beginning of March 2016.

No new releases this quarter. The latest release is Xerces-J 2.11.0 (November 30th, 2010).

Xerces-C

Xerces-C has had a fair bit of activity as of late. Several JIRA issues that were opened by the community have been investigated and resolved since the beginning of June.

Mailing list traffic has been low; roughly 65+ posts on the c-dev and c-users lists since the beginning of March 2016.

No new releases this quarter. The latest release is Xerces-C 3.1.3 (February 17th, 2016).

Xerces-P

Nothing in particular to report. There was no development activity over the reporting period.

XML Commons

No activity over the reporting period.

Committer / PMC Changes

The most recent committers were added in February 2015 (Xerces-C) and May 2009 (Xerces-J).

One new PMC member (Scott Cantor) was added to the PMC this month (June 2016). The previous two additions to the PMC were in May 2010.

Three committers have committed changes to SVN since March.

Apache Project Branding Requirements

The project logo still needs a "TM" to be added to it.
