

# ReleaseNote410

3 September 2014, Apache Solr™ 4.10.0 available

The Lucene PMC is pleased to announce the release of Apache Solr 4.10.0

Solr is the popular, blazing fast, open source NoSQL search platform from the Apache Lucene project. Its major features include powerful full-text search, hit highlighting, faceted search, dynamic clustering, database integration, rich document (e.g., Word, PDF) handling, and geospatial search. Solr is highly scalable, providing fault tolerant distributed search and indexing, and powers the search and navigation features of many of the world's largest internet sites.

Solr 4.10.0 is available for immediate download at:

<http://lucene.apache.org/solr/mirrors-solr-latest-redir.html>

Solr 4.10.0 Release Highlights:

- \* This release upgrades Solr Cell's (contrib/extraction) dependency on Apache POI to mitigate 2 security vulnerabilities:  
<http://s.apache.org/solr-cell-security-notice>
- \* Scripts for starting, stopping, and running Solr examples
- \* Distributed query support for facet.pivot
- \* Interval Faceting for Doc Values fields
- \* New "terms" QParser for efficiently filtering documents by a list of values

Solr 4.10.0 also includes many other new features as well as numerous optimizations and bugfixes of the corresponding Apache Lucene release.

Please read CHANGES.txt for a full list of new features and changes:
