Editing This Wiki

In order to give credit where credit is due, you are now required to log in before you can edit the pages here. Do this by selecting the [UserPreferences](#) link and setting up an account. Then, use this link to log in, and pages will be editable.

Welcome to the Struts Wiki

The goal of the Struts project is to provide an open source framework for building web applications. The core of the Struts framework is a flexible control layer based on standard technologies such as Java Servlets, [JavaBeans](#), resource bundles, and the Extensible Markup Language (XML). These community-driven wiki pages provide a collaboration point between Struts users and developers to help share tips, best practices, and future ideas.

Struts Official Website

- [Struts Home Page](#)
- [Struts Kickstart FAQ](#)

Struts Success Stories

- [Websites built with Struts](#)
- [Webapps based on Struts](#)

Struts Extensions And Libraries

- [StrutsLibraries](#) – Third-party libraries for Struts
- [StrutsExtensions](#) – Extensions for Struts

Annotated documentation

- [StrutsDocComments](#) – Comments for the Struts Documentation, examples, how-tos, diagrams, code samples, proposals and best practices; a knowledge base defined around Struts User's Guide. Contribute your own notes to any part of documentation, but please do not ask question here, use mailing list for questions.

Struts Articles, Tutorials, FAQ's and Tips

- [StrutsNewFaqs](#) – Index of Struts Frequently Asked Question pages
- [StrutsArticles](#)
- [StrutsTutorials](#)
- [StrutsBooks](#)
- [StrutsCatalog](#) – Toward an overview of Struts Design Patterns and Practices
- [AjaxStruts](#) – Information about integrating AJAX into Struts

Project Maintenance and Resources

- [StrutsReleasePlans](#) – Release plans for each Struts release
- [StrutsShortTermPlans](#) – Collection of Struts Committers and other active developers' short term plans
- [StrutsArchives](#) (Archives Carrying Struts Lists)
- [StrutsMaintenance](#) – Notes for committer project maintenance tasks
- [StrutsUpgrade](#) – Notes on Upgrading
- [StrutsCodeAudits](#) – Links to reports on code syntax and quality
- [Continuum](#) – Continuum information

Future Ideas

- [StrutsAction1Planning](#) – Ideas for new versions of Struts 1
- [StrutsAction2](#) – Discussion on plans/tasks for Struts 2

Training And consultants

- [StrutsConsultants](#)
- [StrutsTraining](#)

Integration With Other Frameworks

- [StrutsFaces](#) – JSF integration for Struts 1
- [StrutsMoreAboutJSF](#) – JSF and Struts

- [StrutsAndSpring](#) – Spring Framework and Struts

Tools and IDEs

- [StrutsTools](#)
- [StrutsIDEGuides](#) – Guides to help IDE users work on and with Struts
- [juziku](#)

Miscellaneous

- [SnapshotGuide11/25/06](#)
- [StrutsDeveloperPages](#) – Short bios of Struts committers and contributors
- [StrutsFunStuff](#) – Miscellaneous, generally off-topic pages
- [StrutsWikiTips](#) – Tips to more effectively use this wiki
- [StrutsJobJar](#) – Help wanted
- [StrutsJavaOne2006](#) – Struts specific hangouts/parties and anything else related to Struts at [JavaOne](#)
- [WikiFiles](#) – files related either to Wiki itself, or other non-image files like binaries.

Other

Shale Framework
