HDFS MR YARN TLP Proposal

Arun's proposal...

Proposal: Apache Hadoop HDFS as a TLP

I propose we graduate HDFS as a TLP named 'Apache Hadoop HDFS'.

I think the simplest way is to have all existing HDFS committers [1] be committers and then PMC be the intersection of current Hadoop PMC [2] and the committer list as follows:

hadoop-hdfs = acmurthy,atm,aw,boryas,cdouglas,cos,cutting,daryn,ddas,dhruba,eli,enis,eric14,eyang,gkesavan,hairong,harsh,jitendra,jghoman,johan, knoguchi,kzhang,llu,lohit,mahadev,matei,mattf,molkov,nigel,omalley,ramya,rangadi,sharad,shv,sradia,stack,stevel,suresh,szetszwo,tanping,todd,tomwhite, tucu,umamahesh,vinodkv,yhemanth,zshao [3]

hadoop-hdfs-pmc = acmurthy,atm,cdouglas,cutting,ddas,dhruba,eli,enis,gkesavan,hairong,jghoman,jitendra,mahadev,mattf,nigel,omalley,phunt,rangadi, sharad,shv,sradia,stack,suresh,szetszwo,todd,tomwhite,tucu,vinodkv,yhemanth,zshao

---

Proposal: Apache Hadoop MapReduce as a TLP

I propose we graduate MapReduce as a TLP named 'Apache Hadoop MapReduce'.

I think the simplest way is to have all existing MapReduce committers [1] be committers and then PMC be the intersection of current Hadoop PMC [2] and the committer list as follows:

hadoop-mapreduce = acmurthy,amareshwari,amarrk,aw,bobby,cdouglas,cos,cutting,daryn,ddas,dhruba,enis,eric14,eyang,gkesavan,hairong,harsh,hitesh, jeagles,jitendra,jghoman,johan,kimballa,knoguchi,kzhang,llu,lohit,mahadev,matei,mattf,nigel,omalley,ramya,rangadi,ravigummadi,schen,sharad,shv,sradia, sreekanth,sseth,stevel,szetszwo,tgraves,todd,tomwhite,tucu,vinodkv,yhemanth,zshao

hadoop-mapreduce-pmc = acmurthy,amareshwari,cdouglas,cutting,ddas,dhruba,enis,gkesavan,hairong,jghoman,jitendra,mahadev,mattf,nigel,omalley, phunt,rangadi,sharad,shv,sradia,szetszwo,todd,tomwhite,tucu,vinodkv,yhemanth,zshao

---

Proposal: Apache Hadoop YARN as a TLP

I propose we graduate YARN as a TLP named 'Apache Hadoop YARN'.

I re-propose, based on the previous discussion [4] that the YARN committer list and initial PMC list be:

hadoop-yarn = acmurthy,bobby,cdouglas,ddas,hitesh,jeagles,llu,mahadev,sharad,sseth,tgraves,tomwhite,tucu,vinodkv

hadoop-yarn-pmc = acmurthy,bobby,cdouglas,ddas,hitesh,jeagles,llu,mahadev,sharad,sseth,tgraves,tomwhite,tucu,vinodkv

---

- [1] - The committer lists are available in https://svn.apache.org/repos/infra/infrastructure/trunk/subversion/authorization/asf-authorization-template

- [2] - The current Hadoop PMC list is http://hadoop.apache.org/who.html

- [3] - The minor mod here is to add llu@ & stack@ to hadoop-hdfs since llu@ has contributed a lot to Common i.e. metrics2, and stack@ is on the PMC since he oversees HDFS.

- [4] - Includes everyone who has either 20+ patches or 10+ commits in YARN since project inception in March, 2011.
