YmtdConclusion

Conclusion

We hope that you enjoyed this little excursion into the land of alternatives. Every developer and user in the world has their own opinion on the "right way" to do things. The goal of this document is not to force anyone to believe that the Velocity way is the "Right Way", but instead to let people see the differences between the two approaches and allow one to develop their own opinions about the tools that are in use today.

Some people may disagree strongly with this essay because it challenges conventional thinking as well as the way that they may be doing things today. It is very difficult to show people who believe strongly in something that there might be another solution out there that solves problems in a different way. Therefore, please send us your feedback as it really is important. Instructions for doing so are on the first page.

You make the decision.
