

NamingVote

What sort of names do you think we should use for compiler flags, output directories, source files, etc.

cs, py, rb, pl, erl, hs, st, cl

kballard

csharp, python, ruby, perl, erlang, haskell, smalltalk, commonlisp

dreiss

[StuartSierra](#)

geechorama

kclark

Esteve Fernandez

Ted Dunning

somewhere in between

tlipcon - should base it on that language's conventions. e.g the erlang shell is started by running "erl"
