

BuilderPluginRelease106

Notes on the [MyFaces](#) Build Tools Builder Plugin 1.0.6 Release

Release manager: Leonardo Uribe

Timeline

- Proposed release date: 2010-05-21

Issues

- This release is necessary for release myfaces core 2.0.0-beta.

Testing

Here's how you can help us test the distribution.

Add this to your pom.xml (a node inside <project>)

```
<pluginRepositories>
  <pluginRepository>
    <id>test-builder-plugin-1.0.6</id>
    <name>Test repository for myfaces-builder-plugin 1.0.6</name>
    <url>http://people.apache.org/~lu4242/m2-plugins-106</url>
  </pluginRepository>
</pluginRepositories>
```

then use myfaces-builder-plugin:

```
<plugins>
  <plugin>
    <groupId>org.apache.myfaces.buildtools</groupId>
    <artifactId>myfaces-builder-plugin</artifactId>
    <version>1.0.6</version>
    ..... some stuff ....
  </plugin>
</plugins>
```

myfaces core 1.1.x, 1.2.x, 2.0.x and tomahawk use myfaces-builder-plugin so the most easy way is modify its pom (api/pom.xml, impl/pom.xml for example) for use it, then mvn install and check the generated artifacts.

4. Ask for vote

Hi,

I was running the needed tasks to get the 1.0.6 release of Apache MyFaces Builder Plugin out.

This release includes some changes necessary to build myfaces core 2.0 branch, and other enhancements like the new @JSFBehavior annotation and the addition of javascript compressor code into our codebase.

Testing instructions are available at [3].

Please note that this vote concerns all of the following parts:

1. Maven artifact group "org.apache.myfaces.buildtools" artifact "myfaces-builder-plugin" v1.0.6 [1]
2. Maven artifact group "org.apache.myfaces.buildtools" artifact "myfaces-builder-annotations" v1.0.5 [1]
3. Maven artifact group "org.apache.myfaces.buildtools" artifact "myfaces-javacc-plugin" v1.0.1 [1]
3. Maven artifact group "org.apache.myfaces.buildtools" artifact "myfaces-javascript-plugin" v1.0.1 [1]

The artifacts are deployed to my private Apache account ([1]).

Please take a look at the "1.0.6" artifacts and vote!

Please note: This vote is "majority approval" with a minimum of three +1 votes (see [3]).

```
-----
[ ] +1 for community members who have reviewed the bits
[ ] +0
[ ] -1 for fatal flaws that should cause these bits not to be released,
    and why.....
-----
```

Thanks,
Leonardo Uribe

5. Vote success, continue with the procedure

6. Deploy on repo1.maven.org

```
mvn clean source:jar install deploy -DperformRelease=true -DaltDeploymentRepository=myfaces-staging::default::
scpexe://people.apache.org/www/people.apache.org/repo/m2-ibiblio-rsync-repository
```

7. copy svn branch to tag

8. ANNOUNCE mail

The Apache MyFaces team is pleased to announce the release of Apache MyFaces Builder Plugin.

Apache MyFaces Builder Plugin is a maven plugin, used internally in other projects like myfaces core and tomahawk for generate component classes, tag classes, faces-config files, .tld files and facelets taglib files. In other words, its several maven goals provide a component kit for generate jsf components with minimal effort.

Apache MyFaces Builder Plugin is available in the central Maven repository under Group ID "org.apache.myfaces.buildtools".

Enjoy!
