GSoC2011

GSoC 2011 - Ideas

Cross-subprojects

- Shade integration (e.g. JavaDoc and OSGI bundles) and refactoring of MyFaces-Shared
- Documentation (Wiki, Site and JavaDoc) usability review and refactoring (unification draft based on the ExtVal, Ext-Script and CODI documentation - requires knowledge of those frameworks).

CODI

- Seam-Forge plugin for CODI
- Intellij and Eclipse Plugin for ViewConfigs
- Pluggable repositories for different back-button strategies

ExtVal

- Seam-Forge plugin for ExtVal
- Constraint based JS engine (client-side validation with generated meta-data based on jsr 303 constraints) some ideas

Myfaces Test

- Implement support for creating managed beans from faces-config.xml or other JSF config files. (See https://issues.apache.org/jira/browse/MYFACESTEST-45 for details).
