Diary

1. Preparing tomahawk 1.1.14
   - Try -DdryRun=true SUCCESS

```
mvn clean install
mvn install -Pgenerate-assembly -Papache-release
mvn release:prepare -DprepareRelease=true -DdryRun=true
```

- Release it! FAIL

```
mvn release:prepare -DprepareRelease=true -Dresume=false
mvn install
mvn install -Pgenerate-assembly -Papache-release
mvn release:rollback -DprepareRelease=true
mvn release:prepare -DprepareRelease=true -Dresume=false
```

Note: Preparing the release will create the new tag in SVN, automatically checking in on your behalf.

Note: If you're located in Europe then release:prepare may fail with 'Unable to tag SCM' and 'svn: No such revision X'. Wait 10 seconds and run mvn release:prepare again.

```
mvn release:prepare -DprepareRelease=true
```

- Remove sandbox module from main pom.xml since it is never released
- Update download page

2. Stage the release for a vote

```
mvn release:perform -DperformRelease=true
```

3. Compile assemblies and copy on people.apache.org

```
mvn install -Pgenerate-assembly
cd assembly
mvn package
```

- Copy assemblies

```

 2. Maven artifact group "org.apache.myfaces.shared"   v2.0.14, 3.0.12, 4.0.16, 4.1.8 [1]

The artifacts are deployed to my private Apache account ([1]).

-----------------------------------------------
[ ] +1 for community members who have reviewed the bits

12. ANNOUNCE mail

```
The Apache MyFaces team is pleased to announce the release of Apache MyFaces Tomahawk 1.1.14.

MyFaces Tomahawk provides a series of JavaServer Faces components that go beyond the JSF specification. These
components are compatible with the Sun JSF 1.1 Reference Implementation (RI) or any other JSF 1.1 compatible
implementation. Of course the custom components can also be used with the Apache JSF implementation "MyFaces
Core".

There are also artifacts (tomahawk12, tomahawk20) with enhanced compatibility with JSF 1.2 and JSF 2.0

MyFaces Tomahawk 1.1.14 is available in both binary and source distributions.

    * http://myfaces.apache.org/download.html

MyFaces Tomahawk is also available in the central Maven repository under Group ID "org.apache.myfaces.tomahawk".
