

IRC

Channels

These channels are found on the [Freenode network](#).

#cassandra

General purpose discussion channel.

1. You don't need to ask if you can ask a question, just ask.
2. After asking a question, be patient. It's always possible that no one else knows the answer.
3. Before asking questions, be sure to search the mailing lists ([user](#), [devel](#)) and [wiki](#).
4. Once you've got an answer, considering updating the wiki to help out those that follow.

#cassandra-dev

Discussion related to the development of Cassandra.

1. Keep it on-topic (Cassandra development).
2. Don't answer an off-topic question, that's off-topic too.
3. Off-topic discussions might result in a stern talking-to, and harsh looks.
4. Where stern talking-tos and harsh looks end, kicks and bans begin!
