Apache JDO 2.1 Release Testing

This page describes the release testing for the GA release of JDO 2.1.

Test Procedure

In testing the release candidate, follow these steps.

1. Download the tck2 and tck2 legacy releases from <http://people.apache.org/~mcaisse/jdo2.1-rc2/dist/db/jdo/2.1/>.
2. Extract the files.
3. cd to the jdo2-tck-2.1 or jdo2-tck-legacy-2.1 directory.
4. Edit project.properties, replacing the maven.repo.remote property assignment with the following line (all on one line, no spaces):

```
maven.repo.remote = http://people.apache.org/~mcaisse/jdo2.1-rc2/dist/java-repository,  
http://www.jpox.org/downloads/maven,http://www.jpox.org/downloads/maven-nightly
```

5. The JNDI test cases in tck2 are configured to use Sun's JNDI implementation. To download, go [here](#), click the Download button at 'Download JNDI 1.2.1 & More', accept a license agreement, download 'File System Service Provider, 1.2 Beta 3' and then unpack the downloaded zip. Put the included jars fscontext.jar and providerutil.jar into the lib/ext directory.
6. Run *maven build*
7. Repeat for tck2-legacy

Release Test Results

For each test run, please enter information in the table below describing the results of the test run.

Tester	Date	TCK version	Legacy?	OS, architecture	JVM version	1. failures	1. errors	failed configurations	
Michelle Caisse	2008-3-17	2.1 rc1	no	Windows XP	1.6.0_01	0	0	0	
Michelle Caisse	2008-3-17	2.1 rc1	yes	Windows XP	1.6.0_01	0	0	0	
Craig Russell	2008-3-18	2.1 rc1	both	Mac OS X	build 1.5.0_13-b05-237	0	0	0	RAT showed missing Apache license headers - see JDO-583
Michael Bouschen	2008-3-18	2.1 rc1	both	Windows XP	build 1.5.0_14-b03	0	0	0	
Michael Bouschen	2008-3-18	2.1 rc1	yes	Windows XP	build 1.4.2_12-b03	0	0	0	
Craig Russell	2008-3-19	2.1 rc2	both	Mac OS X	build 1.5.0_13-b05-237	0	0	0	RAT showed 2 missing Apache license headers on signatures files - see JDO-583 Verified that maven artifacts loaded correctly from the staging site; JPOX 1.2.0 works as advertised; .asc signatures checked out ok;.md5 checksum verified. All tests passed on both tck2 and tck2-legacy.
Michelle Caisse	2008-3-21	2.1 rc2	no	Windows XP	1.6.0_01	0	0	0	Tested runtck.iut. In order to get the test to pass, I needed to modify build.properties and iut-persistence.xml as described in JDO-585 and JDO-586. Implementations are permitted to modify these files.
