Tapestry5HowToUseTapestryTest

Tapestry 5 Test - http://tapestry.apache.org/tapestry5/tapestry-test/ allows you to use Selenium to test your code.

Tapestry Test requires you have the following configured in your project

- src/test/conf

Containing

- keystore - generate as by http://docs.codehaus.org/display/JETTY/How+to+configure+SSL or see below
- webdefaults.xml - sample attached.
- src/main/webapp

Containing your tapestry application.

You then create a test as described on the Tapestry Website and it should all work!

Generating the Keystore

Run

```
keytool -keystore keystore -alias jetty -genkey -keyalg RSA
```

This is interactive you should respond with Password 'tapestry'. Press Enter for all details. Type Yes for is in Press Return to use same password

This is what it should look like

```
Enter keystore password:
Re-enter new password:
What is your first and last name?
  [Unknown]:
What is the name of your organizational unit?
  [Unknown]:
What is the name of your organization?
  [Unknown]:
