

OSGiMetaData

Configuring OSGi metadata via the jar plugin

```
<plugin>
  <artifactId>maven-jar-plugin</artifactId>
  <configuration>
    <archive>
      <manifestEntries>
        <Bundle-SymbolicName>org.apache.commons.lang</Bundle-SymbolicName>
        <Bundle-License>http://www.apache.org/licenses/LICENSE-2.0.txt</Bundle-License>
        <Bundle-ManifestVersion>2</Bundle-ManifestVersion>
        <Bundle-Name>Apache Commons Lang Bundle</Bundle-Name>
        <Bundle-Vendor>${project.organization.name}</Bundle-Vendor>
        <Bundle-Version>${project.version}</Bundle-Version>
        <Export-Package>
org.apache.commons.lang;version=${project.version},
org.apache.commons.lang.builder;version=${project.version},
org.apache.commons.lang.enum;version=${project.version},
org.apache.commons.lang.enums;version=${project.version},
org.apache.commons.lang.exception;version=${project.version},
org.apache.commons.lang.math;version=${project.version},
org.apache.commons.lang.mutable;version=${project.version},
org.apache.commons.lang.text;version=${project.version},
org.apache.commons.lang.time;version=${project.version}
        </Export-Package>
        <Import-Package>
org.apache.commons.lang;version=${project.version},
org.apache.commons.lang.builder;version=${project.version},
org.apache.commons.lang.enum;version=${project.version},
org.apache.commons.lang.enums;version=${project.version},
org.apache.commons.lang.exception;version=${project.version},
org.apache.commons.lang.math;version=${project.version},
org.apache.commons.lang.mutable;version=${project.version},
