Release Manager

The release manager is **Wendy Smoak**

Special Issues

This release is likely to be an interim **test build** release of Shale technology. As such, you should assume that the APIs are still evolving and subject to change. For a stability rating on each API, see <http://struts.apache.org/struts-shale/api-stability.html> for more information.

Outstanding Bug Review

ID	Summary	Component	Status	di al og	LAT ER [1]]]></ac:plain-text-body></ac:structured-macro>

[1] The dialog facility is in need of improved functionality for handling multiple simultaneously active dialogs, and dealing with back buttons. This issue is deferred to Shale 1.0.2 or later.

[2] The proposed solution to this issue is to cut-n-paste the HTML parser that Tapestry uses for reading templates. Before going that way, it would be important to see if the Tapestry developers were interested in abstracting out this code (perhaps to a commons project) so that it could be shared more easily.

[3] The Shale contribution to addressing this issue is to ensure that META-INF/clay-config.jar resources in JAR files loaded as part of the application are automatically loaded. The actual configuration resources for a given component library such as Tomahawk, however, should be provided by the component library itself rather than by Shale.

[4] Will be addressed as part of the overall support for multiple simultaneously active dialogs.

[5] RFE to be reviewed for a subsequent release.

Remaining Development Tasks

Description	Status
Dialog - support multiple in-progress dialogs	LATE R
(New) - optional layer of annotation support if running on JavaSE 5	✓
Documentation - finish basic feature descriptions	LATE R

Preparation Checklist

	Description	Status
1.	Announce plan to dev@ list	✓
2.	Review/Complete Remaining Development Tasks	✓
3.	Review/Resolve Outstanding Bugs	✓
4.	Update Release Notes	✓
5.	Check Dependencies	✓
6.	Update to version 1.0.1 default.properties, project.xml, build/maven2/*.pom	✓

The Commons [Preparation Guide](#) is a helpful preparation backgrounder, but Commons uses the "beta/release-candidate/final" process.

Likewise, the [HTTPD Release Guidelines](#) is a helpful "overall process" backgrounder, but HTTPD does not use a test-build stage.

Dependency versions for this release:

Dependency	Version	Status	Used In
Commons BeanUtils	1.7.0	Released	core, clay
Commons Chain	1.0.0	Released	core, clay
Commons Digester	1.7.0	Released	core, clay
Commons Logging	1.0.4	Released	core, clay, test, usecases
Commons Validator	1.2.0	Released	core
JavaServer Faces	1.1	Released	core, clay, test, usecases
Spring Framework (Optional)	1.2.2	Released	core
Struts Tiles Standalone	—	Struts Sandbox	core

Because this is a test build release, a dependency on an unreleased component is acceptable.

Testing Checklist

Testing Summary

	Description	Completed
1.	Run Unit Test targets against JSF RI	✓
2.	Run Unit Test targets against MyFaces	✓
3.	Run Use Cases system integration tests (see below)	✓
4.	Play test bundled applications	✓

Use Cases System Integration Tests

	J2SE Version	Tomcat Version	JSF Version	Status
1.	J2SE 1.4.2 _10	Tomcat 5.0.28	JSF RI 1.1 _01	✓
2.	J2SE 1.4.2 _10	Tomcat 5.0.28	MyFaces 1.1.1	✓
3.	J2SE 1.5.0 _06	Tomcat 5.0.28	JSF RI 1.1 _01	✓
4.	J2SE 1.5.0 _06	Tomcat 5.0.28	MyFaces 1.1.1	✓
5.	J2SE 1.5.0 _06	Tomcat 5.5.15	JSF RI 1.1 _01	✓
6.	J2SE 1.5.0 _06	Tomcat 5.5.15	MyFaces 1.1.1	✓

Test Build Checklist (A)

See also Commons [Step-by-Step Guide](#)

	Description	Completed
A1.	Tag release in svn: STRUTS_SHALE_1_0_1	✓
A2.	Run Release Target	✓
A3.	Upload Distribution to cvs.apache.org:/www/cvs.apache.org/dist/struts/shale/v1.0.1	✓
A4.	Post release-quality vote on dev@ list	✓

Vote (A)

PMC Member	Quality
Wendy Smoak	Alpha
Craig McClanahan	-1 due to missing source code in the SQL Browser app

Voting thread is [here](#)

If release vote fails, including for a lack of quorum, remove from dist folder. *[DONE]*

Point Release Checklist (B)

	Description	Completed	
<ac:structured-macro ac:name="unmigrated-wiki-markup" ac:schema-version="1" ac:macro-id="3e8bf70d-ba2b-4b6f-b173-1d1d6aef71bc"><ac:plain-text-body><![CDATA[B1.	Create Sums and Sign Distributions [2]	-]]></ac:plain-text-body></ac:structured-macro>
B2.	Request new Bugzilla version level (1.0.0)	-	
B3.	Update "Acquiring" page on website and Test Downloads	-	

Vote (B)

PMC Member	Quality

Voting continues until a GA or "withdraw" vote passes, or there is a subsequent release.

General Availability Checklist (C)

	Description	Completed	
<ac:structured-macro ac:name="unmigrated-wiki-markup" ac:schema-version="1" ac:macro-id="c95d07f3-7b4b-4344-9fd4-412e1bf147b7"><ac:plain-text-body><![CDATA[C1.	Copy Distribution to Mirrored Directories [3]	-]]></ac:plain-text-body></ac:structured-macro>
C2.	Deploy JARs to Apache Java-Repository	-	
C3.	After 24 hours, update "Acquiring" page on website	-	
C4.	Post an announcement to lists and website	-
