- [Generating Web content with Cocoon](#) on webreference.com
- [Metabox - Building Applications with less code](#)
This article shows how to build database Web applications using Oracle, two open-source frameworks, and MetaBOX software. Building database Web applications is commonly a repetitive task; many such applications are based on insert/delete/update statements of tables in a form of simple rows, multiple rows, or master/detail combinations. (source: out of the article)
