

JPraher

JPraher is an Austrian guy interesting in Language and VM Design and is keen on open source infrastructures.

Currently I'm writing my diploma thesis about LLVM and aspect oriented monitoring of system applications.

I've experiences with a whole lot of technologies:

- linux/bsd/plan9 architecture (elf,ld-linux,...)
- compiler design
- virtual machines
- language design
- type theory (I'm getting into it)
- ...

currently I've worked with/on

- gas (gnu assembler)
- elf format; especially dynamic linking (pic,got,...)
- gcc/gcj [gimple,new-abi]
- llvm
- whole lot of languages like self,smalltalk,ml,ocaml,lisp,c/c++,java,gnu assembler...

You can drop me a message under jpraher AT yahoo DOT de.
