

Mailing lists

For treatment of the openoffice.org email forwarding service, please see [this page](#).

The following are the top 100 lists, in order of posts from Feb 2010 to the present. This covers period covered by the 3.2.1 and 3.3 releases, as well as the 3.4 beta.

General principles:

1. The core project list is ooo-dev. All proposals and votes occur on this list, as well as discussions by project members about the project and product.
2. We'll have one users list per language, created when sufficient demand is evident.
3. We'll have one general list per language, created when sufficient demand is evident.
4. We will try to avoid fragmenting the community by creating additional lists.

List Name	Language	Subscribers	Posts in 2011	Apache Target	Migration Owner	Notes	Migration Status /Notification
Community mailing lists							
securityteam				Migrate to ASF		All OpenOffice codebase security list. Distinct from ooo-security.	⚠ Under discussion
