Hclose

#FORMAT plain hclose(1) HADOOP hclose(1)

NAME
hclose - close a TaskTracker for some reason.

SYNOPSIS
hclose [-h] [-jt jt1;jt2..] HOSTNAME

DESCRIPTION
Close the TaskTracker specified by HOSTNAME. After closed, it will
not accept new MAP/REDUCE tasks. But tasks currently running will
continue until finished. It is useful to maintenance the host.

-h
Display usage information

-jt jobtracker url link
Specify the cluster by the jobtracker url link, for example.
-jt hostA:3479;hostB:3479 EXAMPLE
% hhosts
HOST STATUS MAX MAP REDUCE FAILURE TMP_SPACE
c0101 ok 8 0 0 0 203M
c0102 ok 8 0 0 0 553M

% hclose c0102
Host <c0102> will be closed, please confirm by hhosts/hload

% hhosts
HOST STATUS MAX MAP REDUCE FAILURE TMP_SPACE
c0101 ok 8 0 0 0 203M
c0102 closed 8 0 0 0 553M AUTHOR
