Commercial Support

Commercial Apache Directory™ Support Offerings

Several companies have built products and services around the Apache Directory™ project. This page is dedicated to providing descriptions of those offerings and links to more information. Companies are definitely encouraged to update this page directly or send a mail to the Apache Directory™ PMC (private@directory.apache.org) with a description of their offerings and we can update the page. The products and services listed on this page are provided for information use only to our users. The Apache Directory™ PMC does not endorse or recommend any of the products or services on this page. See below for information about what is appropriate to add to the page.

ApacheDS™ Related Offerings

Keydap

Keydap provides custom identity management solutions built around ApacheDS™.

Keydap distributes a custom version of ApacheDS™ called 'Keydap Server' with many value added features including Multi-Master replication for free under Apache License v2.0 and offers commercial support for both ApacheDS™ and Keydap Server.

Policy for additions to this page

Companies are free to add information about their products and services to this page. The information must be factual and informational in nature and not be a marketing statement. Statements that promote your products and services over other offerings on the page will not be tolerated and will be removed. Such marketing statements can be added to your own pages on your own site, but not here.

When in doubt, email the Apache Directory™ PMC (private@directory.apache.org) and ask. We'd be happy to help.
