

OAuth 2.0 Client Demo

OAuth 2.0 Client Demo

You can run OAuth 2.0 client demo locally. Simply download and run (*mvn jetty:run*) [OAuth 2.0 demo module](#) and point your browser to <http://localhost:8080>. It works great with every site that supports OAuth 2.0 (at least draft 10), i.e. Facebook or GitHub.

Note: see also <https://issues.apache.org/jira/browse/OLTU-50>
