We aim to make Apache Oltu a mature OAuth 2.0 Java implementation. If you notice a bug, you have a feature request or if you think we can improve a library in a particular way, please let us know by creating an issue at OLTU [JIRA](#)

We welcome any contribution to Oltu from the community so feel free to either send a patch or become a committer.
You're encouraged to use our official mailing list - user@oltu.apache.org
