

Mailing lists and IRC

Mailing lists and IRC

Mailing list etiquette

Please consider the following before posting Emails to the lists:

- No posts with html
- No cross posting.
- Change the subject when appropriate (meaning when the conversation topic has shifted to something other than the old subject line)
- Start threads with tags for tracking different kinds of subjects. So far we have the following for the dev list:
 - [ApacheDS]
 - [Triplesec]
 - [Studio]
 - [Site] Topics
 - [Community] For articles etc.
 - [Release]
 - [Vote]
 - [OT]

An article by Eric Steven Raymond very worth reading is found here: [How To Ask Questions The Smart Way](#).

Project mailing lists

These are the mailing lists that have been established for this project.
For each list, there is a subscribe, unsubscribe, and an archive link

Name	Subscribe	Unsubscribe	Post	Archive
The Directory Developers List	Subscribe	Unsubscribe	Post	mail-archives.apache.org
The Directory Users List	Subscribe	Unsubscribe	Post	mail-archives.apache.org
The Directory Commits (SVN) List	Subscribe	Unsubscribe	-	mail-archives.apache.org
The LDAP API List	Subscribe	Unsubscribe	Post	mail-archives.apache.org

IRC channels

Users IRC channel : #apache-directory @ [irc://irc.freenode.net](#)

Developers IRC channel : #apache-directory-dev @ [irc://irc.freenode.net](#)
