January 2014

MyFaces Quarterly Report January 2014

The Apache MyFaces project is an umbrella project of the Apache Software Foundation
for projects relating to the JavaServer Faces (JSF) technology.

Community

- New Committers
    - Dennis Hörsch (11/November/13)
    - Paul Nicolucci (11/November/13)
- No new PMC Members (since July 2011)
- No new Contributors

The MyFaces community is stable. Besides working on new releases, we discuss upcoming topics.
-> Community business as usual (nothing special to report).

Releases

- MyFaces (sub) projects with new releases since the last report:
    - MyFaces Test 1.0.5 (23/October/13)
    - MyFaces Core 2.0.19 (28/October/13)
    - MyFaces Core 2.1.13 (28/October/13)
    - MyFaces Core 2.2.0-beta (29/October/13)
    - MyFaces Tobago 2.0.0 Alpha2 (11/October/13)
    - MyFaces Tobago 1.5.11 (11/November/13)
    - MyFaces Trinidad Maven Plugins 2.0.8 (7/November/13)
    - MyFaces Trinidad 2.1.0 (19/November/13)

Wiki/CMS

- CWiki -> CMS migration (ongoing)

Issues

- The Release of MyFaces 2.2 is blocked due to an inability to acquire a JSF TCK more recent than February 2013. The Feburary TCK is flawed and we need a more recent version to pass the TCK. Discussion continues on how we should resolve this, but we probably do not have enough expertise to resolve how to acquire a newer TCK or how to do a release without the TCK within the MyFaces community. We are considering talking with other projects who might be in the same situation.
