GitHub

GitHub

Available as of Camel 2.15

The GitHub component interacts with the GitHub API by encapsulating egit-github. It currently provides polling for new pull requests, pull request comments, tags, and commits. It is also able to produce comments on pull requests, as well as close the pull request entirely.

Rather than webhooks, this endpoint relies on simple polling. Reasons include:

- · Concern for reliability/stability
- The types of payloads we're polling aren't typically large (plus, paging is available in the API)
 The need to support apps running somewhere not publicly accessible where a webhook would fail

Note that the GitHub API is fairly expansive. Therefore, this component could be easily expanded to provide additional interactions.

Maven users will need to add the following dependency to their pom.xml for this component:

```
<dependency>
   <groupId>org.apache.camel</groupId>
    <artifactId>camel-github</artifactId>
    <version>${camel-version}</version>
</dependency>
```

URI format

github://endpoint[?options]

Mandatory Options:

Note that these can be configured directly through the endpoint.

Option	Description		
username	GitHub username, required unless oauthToken is provided		
password	GitHub password, required unless oauthToken is provided		
oauthToken	GitHub OAuth token, required unless username & password are provided		
repoOwner	GitHub repository owner (organization)		
repoName	GitHub repository name		

Consumer Endpoints:

Endpoint	Context	Body Type
pullRequest	polling	org.eclipse.egit.github.core.PullRequest
pullRequestCo mment	polling	org.eclipse.egit.github.core.Comment (comment on the general pull request discussion) or org.eclipse.egit.github.core. CommitComment (inline comment on a pull request diff)
tag	polling	org.eclipse.egit.github.core.RepositoryTag
commit	polling	org.eclipse.egit.github.core.RepositoryCommit

Producer Endpoints:

Endpoint

pullRequestComm ent	String (comment text)	 GitHubPullRequest (integer) (REQUIRED): Pull request number. GitHubInResponseTo (integer): Required if responding to another inline comment on the pull request diff. If left off, a general comment on the pull request discussion is assumed. 	
closePullRequest	none	GitHubPullRequest (integer) (REQUIRED): Pull request number.	
createlssue (From Camel 2.18)	String (issue body text)	GitHublssueTitle (String) (REQUIRED): Issue Title.
