Ecosystem

This page contains a list of Samza-related projects and tools. Please feel free to update it with contributions.

Name	Description
Hello Samza	Hello Samza is a getting-started repository to show how a simple Samza project's code layout looks.
Coast	A DSL that builds DAGs on top of Samza. See hello-coast for examples.
Samza-Luwak	Uses Luwak, a stored-query engine built on Lucene, to implement full-text search on streams.
Newsfeed	Sample implementation of a Twitter-like newsfeed (users post messages to their followers) using Samza.
Freshet	CQL based Clojure DSL for Apache Samza.
Hello Samza (Confluent)	A version of Hello Samza (see above) that uses Confluent's schema registry and Avro serialization.
Hello Samza (Scala)	A version of Hello Samza written in Scala. Contributed by Snowplow Analytics.
