Solr1.3

Solr 1.3

Solr 1.3 was released on September 16, 2008.

If you found a link to this page in some documentation it was there to alert you to the fact that it described a feature that was first introduced in the Solr 1.3 release. Older releases did not have this feature.

Notes About The Release

@Deprecation

In Solr 1.3, many classes were moved around. Although classes compiled against 1.2 will run in 1.3, updating class references is recommended.

Specifically:

- many classes from *org.apache.util* moved to *org.apache.common.util*
- many classes from *org.apache.solr.request* moved to *org.apache.solr.common.params*
- *org.apache.solr.request.StandardRequestHandler* moved to *org.apache.solr.handler.StandardRequestHandler* and is a subclass of *org.apache.solr.handler.SearchHandler*
- *org.apache.solr.request.DisMaxRequestHandler* moved to *org.apache.solr.handler.DisMaxRequestHandler* and deprecated in favor of adding 'defType=dismax' to StandardRequestHandler init params
