

BuildTestingCI

Continuous Integration

Apache Hama makes use of Jenkins[1] for its Continuous Integration.

Prerequisite

Job building operations require an account[2], created using Whimsy Tool, to be created beforehand. Building, Testing, CI related issues such as Jenkins support JDK version, please contact builds@apache.org. Infrastructure related, such as Jenkins account, wiki user account and so on, please contact users@infra.apache.org. [3] contains best practice regarding to Apache infrastructure status.
