

BeanUtils

Commons [BeanUtils](#) Component

Commons-BeanUtils provides easy-to-use wrappers around the Java reflection and introspection APIs.

A lot of information is available on the [BeanUtils website](#). If you don't find the information you need you can always contact us using one of the [mailing lists](#).

You can find answers to commonly-asked questions on [The Frequently Asked Questions Page \(FAQ\)](#).

August 2008 [BeanUtils 1.8.0](#) has been released, four years after the previous 1.7.0 release. However [BeanUtils](#) is reasonably stable and currently in *maintenance mode*, with quite a few outstanding tickets present in JIRA. If you find a problem with [BeanUtils](#), please do report it by creating a [JIRA ticket](#). At the current time, however, it is unlikely that there will be any major development on [BeanUtils](#).

Related Open Source Projects

The following is a list of [Open Source](#) projects that perform similar functions to BeanUtils:

Project	License	Description
Beanlib	AL 2.0	Java Bean Library (beanlib) is a utilities library for use with JavaBean
Morph	AL 2.0	
OGNL	AL 1.1	OGNL stands for Object-Graph Navigation Language; it is an expression language for getting and setting properties of Java objects.
