

Logging NightlyBuilds

Nightly build artifacts are provided purely for test purposes and are NOT official releases of the Apache Software Foundation.

Builds

Nightly builds are built once a day from the current SVN HEAD, and can be found at <http://people.apache.org/builds/jakarta-commons/nightly/commons-logging>.

Maven 2.x

The nightly build is also deployed to the apache maven2 snapshot repository at <http://people.apache.org/repo/m2-snapshot-repository> .

Build Logs

If the nightly build has failed, then further information can be found in the [build logfiles](#)
