TheSandbox

Policy

- Published - Sandbox component is on the Jakarta Commons website
- Unpublished - Obvious
- Dead - An inactive project (deprecated, should be replaced by dormant over time)
- Dormant - An inactive project (found in the dormant/ directory)
- Promoted - Now in Commons Proper, probably needs deleting of old sandbox directory
- ?? - Unknown

Component	State	Plan
Id	Published	In development, promotion target, strong use case, stable code. Parts from Lang, parts new.
SQL	Published	Moved to db.apache.org as DdlUtils
FeedParser	Published	
Jex	Unpublished	
Launcher	Unpublished	
Servlet	Unpublished	not enough here to justify a component
Benchmark	Unpublished	
Validator2	Unpublished	
Altrmi	Dead	Moved from the Incubator to Codehaus now JRemoting.
Graph	Dead	rewritten as graph2
JRCS	Dead	no longer really hosted by Jakarta. It has moved to Codehaus Codehaus CVS
Pattern	Dead	code moved to lang and id projects.
Filters	->dormant	meant to contain servlet filters, but not yet come alive
HTTP	->dormant	handful of classes for use with http connections
Periodicity	->dormant	
Reflect	->dormant	Extracted from BeanUtils, but unfinished and in a coma. Proved to difficult to test across JVMs and for little benefit. Code moved/reextracted to Lang.
Threading	->dormant	migrated over from Avalon Excalibur. Currently inactive.
xo	->dormant	XML to Bean mapper.
cache	->dormant	

grant	->dormant	
graph2	->dormant	
jux	->dormant	
rupert	->dormant	
services	->dormant	
simplestore	->dormant	
xmlunit	->dormant	
Cache	->dormant	
Clazz	->dormant	Dormant, no clear use case, no community, stable code. Was too complex for many (who could use DynaBean), and not complex enough for others (who needed a Java syntax tree as found in Eclipse/Netbeans)
Commons Convert	->dormant	Development intended, strong use case. Various conversion ideas extracted from BeanUtils.
Events	->dormant	Dormant, no current community.
Functor	Published	Currently being groomed for promotion to proper.
JJar	->dormant	superseded by Apache Depot (currently in the incubator)
Mapper	->dormant	
Messenger	->dormant	In fact dead, real version is at Codehaus nowadays
Scaffold	->dormant	is a toolkit for building web applications, to complement web application frameworks (such as Struts).
Test	->dormant	
ThreadPool	->dormant	
Workflow	->dormant	
periodicity_1	->dormant	
joran	->dormant	
launcher	->dormant	
bzip2	->dormant	

morphos	->dormant	
jdbc2pool	->dormant	
cjan	->dormant	superseded by Apache Depot (currently in the incubator)
amend	->dormant	
Cadastre	Deleted	JNDI implementation of some kind.
Util	Deleted	this component split into many others and eventually the original component was left with nothing.
Armi	Deleted	prior name of 'altrmi'.
uid	Deleted	prior name of 'id'.
joran	Deleted	
meiyo	Unpublished	class-scanning component
classscan	Unpublished	will incorporate Geronimo xbean-finder with other ideas including those of 'meiyo'

Promoted components:

Component	Description
VFS	Virtual Filesystem
Compress	compression code initially extracted from Apache Ant.
SCXML	Reference Implementation of State Chart XML (SCXML), currently a W3C Working Draft.
