VfsCookbook

VFS Cookbook

An assortment of code examples with the intent of solving specific tasks using the VFS API. Once you finally figure out how to do something with VFS, post a recipe here for others to use.

Extracting from Tar files

ExtractAndDecompressGzipFiles - Here is a two phase example. It illustrates multiple access schemes contained in the name parameter of FileSystemManager.resolveFile(String name).

Simple SFTP file downloader

SimpleSftpFileDownload - Here is an example for getting files that match a filename pattern from a remote system using the VFS protocol.
