

VfsReleaseState

Upcoming commons-vfs2-2.2 release

- News: Apache Commons VFS 2.1 has been released.
- State: next release 2.1.1 or 2.2 is considered

Todo List for Releases

Things to be aware of

- VFS is a multi-module project, sandbox is even optional (profile)
- the maven-release-plugin does not work very well with the current release strategy of Apache Commons (Tag after vote)
- tag conventions in the 2.0 release have a bit messed up the repo. The 2.0 release is named (VFS-1.0 vs. commons-vfs2-project-2.0)
- JIRA report does not include more than 100 fixes and changes-plugin cant page (<http://jira.codehaus.org/browse/MCHANGES-351>). As INFRA cant raise the limit. The report is not prominent, so we will create it incomplete.

After Release

- Mark Version as released, close all resolved Bugs in Version. Change Fix Version for unresolved bugs
- open next snapshot
- DOAP file
