PostingManyFilesToExtractingRequestHandler

#Describe PostingManyFilesToExtractingRequestHandler here.

Posting Multiple Files To Extracting Request Handler

To post multiple files(all files within current directory and it's sub-directories)to Solr's Extracting Request Handler, simply execute the following command after going to the appropriate directory.

```
find . -name "*" -type f -exec java -Dauto -jar post.jar "{}" \;
```

Also refer Reference for other ways of posting to Extracting Request Handler.
