BoardReport-November2013

Apache Turbine Project Board Report, November 2013

Apache Turbine is a servlet based framework that allows experienced Java developers to quickly build web applications. Turbine allows you to personalize the web sites and to use user logins to restrict access to parts of your application.

Turbine is a matured and well established framework that is used as the base of many other projects.

Status

The Turbine project has had a quite busy quarter by our measures.

The Turbine project has no board-level issues at this time.

Project Branding Board Report Checklist

The last issue left is

- TODO: Logos and Graphics : include TM

Community changes

No new committers were voted in since the last board report.

The last change to the committer base was the addition of Georg Kallidis (2012/09/19)

Georg Kallidis has been voted into the PMC (2013/09/30).

Turbine core project

The Turbine core project proceeds slowly to the next milestone release which shall include a modified security implementation and support for the Quartz scheduler to replace the built-in one.

- A new parent POM (3) has been released to support site publishing with svnpubsub (2013/09/25)

Fulcrum component project

A new JSON component has been added to the Fulcrum sub-project in this quarter.

- Fulcrum parser 1.0.3 has been released (2013/10/11)
