

HelpOnRules

Horizontal Rules

You can insert a horizontal rule across the page by typing four or more dashes. The number of dashes in a horizontal rule markup determines how thick it is, up to a limit of 10.

For more information on the possible markup, see [HelpOnEditing](#).

Example

```

--- (not a rule)
-----
-----
-----
-----
-----
-----
-----
-----
-----
----- (not thicker than 10)

```

Display

— (not a rule)

---- (not thicker than 10)
